Your motivation to become a DigiTec.PILOT

In order to get one of the 20 places as a DigiTec.PILOT, you should briefly explain in a motivation letter why you absolutely want to become a DigiTec.PILOT. Below we give you a few hints on how and what you should pay attention to.

Hints for your motivation letter

- ✓ Keep it short and to the point, according to the agile principle "eliminate waste". The motivation letter should not be longer than one page.
- ✓ Only you know your reasons for participating, so you are of course free to formulate your motivation as you wish.
- ✓ Sometimes it can be difficult to describe your own motivation. Therefore, here are a few questions that may help you:
 - What are you currently studying/working on and what are you missing in terms of digitalization in your studies/job?
 - What do you hope to learn in terms of content?
 - Are there specific tasks where you would benefit from the expertise as a DigiTec.PILOT?
 - What do you personally expect to achieve with the competencies as a DigiTec.PILOT?
 - Are there already specific plans or ideas what you want to do with the DigiTec.PILOT certificate?

My motivation letter:
